

## **JOB DESCRIPTION**

**Assistant, Associate or Full Professor in Supply Chain Analytics & Data Science**  
**KEDGE Business School (Campus of Bordeaux, France)**  
**Operations Management and Information Systems Department (MOSI)**

The Department of Management of Operation and Information System (MOSI) at KEDGE Business School invites applications for full-time, professorial appointments in Supply Chain Analytics & Data Science to begin September 2021.

KEDGE Business School is a vibrant business school with 4 campuses in France (Paris, Bordeaux, Marseille, and Toulon), 3 abroad with 2 in China (Shanghai and Suzhou), 1 in Africa (Dakar) and 3 associated campuses (Avignon, Bastia, Bayonne). The KEDGE Business School community includes 12,600 students (25% foreign students), 183 full-time faculty members (44% of which are international), 275 international academic partners and 55,000 alumni across the world. Ranked 31rd amongst European Business Schools and 41th worldwide for the Executive MBA by the Financial Times. KEDGE Business School is AACSB, EQUIS and AMBA accredited and a member of the French Conférence des Grandes Écoles. Based on its distinctive position as a school for leaders for the 21<sup>st</sup> century, KEDGE Business School aims to transcend the boundaries between higher education and business through innovation and to have a positive social, economic and environmental impact on society.

The Center of Excellence in Supply Chain Innovation and Transportation (CESIT) at Kedge aims at meeting the economic, environmental and societal challenges raised in the Supply Chain, by co-developing, with companies, collectivities, institutional and academic partners, the concepts, methods and innovative tools necessary for the organization and transformation of the supply chain. Our actions impact academic research, the corporate world, society and education. CESIT experts are at the heart of news and research into supply chains on a national and international level. They also intervene regularly in the media to provide insight into the news through their expertise and work and they organize and participate in many seminars with their international conferences.

The Operations Management and Information Systems Academic Department (MOSI) at KEDGE Business School brings together professors from disciplines including procurement management, supply chain management, quality management, and information systems management. Professors from the MOSI department provide theoretical and practical teaching designed to provide students with specific knowledge as well as giving them global and cross-disciplinary insight into supply chain management.

Candidates will hold a PhD, demonstrate a sound research record with an active research program signaling a high research potential, have excellent teaching capabilities and be willing to engage in innovative project supervision and development, as well as other service activities. A particular attention will be given to candidates with interests and experience in Analytics and Data Science applied to Operations and/or Supply Chain Management.

Interested candidates should apply electronically at [faculty@kedgebs.com](mailto:faculty@kedgebs.com), and provide the following elements:

- a cover letter containing your motivation for one of the positions
- an up-to-date curriculum vitae with a list of publications and most recent representative research papers
- a research statement
- a teaching statement (including course details and course evaluations)

**Tasks :**

- Teaching and educational development (undergraduate, graduate and post graduate level).
- Publication in academic and professional journals.
- Research Projects with companies or international institutions
- Participation in national and international calls for projects
- Student supervision and coaching

**Requirements :**

- Teaching experience related to Supply Chain Analytics.
- Publication in the areas of Operations and Supply Chain Management
- PhD or equivalent.

Start date : September 2021
