

# SHARE CONFERENCE

March 21-22, 2019

Northeastern University

## Sharing Economy: Research on Access, Technology, Equity and Applications

This conference will bring together researchers from disciplines including business, computing, economics, engineering, law, public policy and sociology with thought leaders from the private and government sectors to:

- Discuss challenges behind current markets, regulations and policies associated with sharing economy systems and explore potential solutions
- Consider emerging technologies and algorithms for optimizing design, operation, incentives, and security of sharing economy systems
- Examine how the sharing economy can enable socially desirable outcomes, including sustainable growth, social equity and improved resilience

Application areas to be explored include cloud computing, distributed energy, healthcare delivery, lodging and urban mobility.
