“WE HAVE NO IDEA!”

PRESENTED BY JORGE CHAM FROM PHD COMICS

Wednesday, October 18, 2017 from 2 to 3:30p.m.

9th floor, Molson Building (1450 Guy St.)

Jorge Cham isn't interested in what we know, but also what we don't know about the Universe.

How else will the next generation of scientists and explorers be inspired to go out there and expand our horizons?

Cham will relay his experiences creating successful science communication projects and communicating his passion for engaging with the public and exploring the unknown. His animated explanations of the Higgs Boson and Gravitational Waves went viral, and each has been viewed over 2 million times.

About the speaker

Jorge Cham got his PhD in Mechanical Engineering at Stanford University, and was a full-time Instructor and researcher at the California Institute of Technology (Caltech) from 2003-2005. He is the creator of PHD Comics (Piled Higher and Deeper), the popular comic strip about life (or the lack thereof) in academia.
