

*MAS-sponsored webinar:
Chancification and Military Readiness*

Determinism yields decisions that are fragile and prone to unexpected outcomes. Alternatively, chance-informed decisions consider risks and rewards with a probabilistic examination of each. Such an approach is essential when analyzing and forecasting military readiness.

Dr. Sam L. Savage will use examples in military readiness, healthcare, project management, and other fields to demonstrate how professionals can build interactive chance-informed dashboards to help make uncertainty actionable in the decision-making process.

Dr. Sam Savage

Join us on Wednesday, 4 May 2022 from
3:00 – 4:00 pm Eastern Daylight Time
