

# STOCHMOD 2020

## The 8th Stochastic Modelling Meeting of the EURO Working Group on Stochastic Modelling

*Milan, 10-12 June 2020*

### SCOPE

The scope of the StochMod meeting includes both theoretical advances in stochastic modelling techniques and relevant applications. The contribution may lie in the formulation of new stochastic models, in the development of new analytical methods, or in the innovative application of existing models and methods.

Its eight edition will take place in Milan, at Politecnico di Milano

### TOPICS

Theoretical research topics include but are not restricted to stochastic modelling and methods in:

- Markov decision processes
- Stochastic processes
- Robust and multicriteria decision making
- Queueing theory
- Simulation
- Machine learning and data science
- Game theory and behavior theory
- Stochastic programming

in different application fields.

### SUBMISSION

We welcome submissions of abstracts about your recent research in any of the areas listed above. This may cover a recently published paper (or a series of papers) or work in progress. To submit an abstract, detailed instructions and template files are published on the conference web site <https://www.stochmod2020.polimi.it>.

#### Important dates

- **February 16, 2020:** Abstract submission
- **March 9, 2020:** Acceptance/Rejection Notification
- **April 30, 2020:** Final Camera-ready Abstracts
