

Call for Sessions within the Transportation Science & Logistics Section of the INFORMS

Dear All,

The Transportation Science & Logistics Section of the INFORMS is seeking session chairs and abstracts for 2018 INFORMS International Conference, June 17-20, 2018 Taipei, Taiwan.
(<http://meetings2.informs.org/wordpress/2018international/>)

We are now looking for session organizers fitting in this stream. The broad themes of TSL include Freight Transportation and Logistics, Urban Transportation Planning and Modeling, Facility Logistics, Air Transportation, and Intelligent Transportation Systems (ITS). If your talk does not fit within the broad themes but is related to transportation and logistics, please feel free to contact me.

Would you be interested to organize a session of 4 talks on some particular topic within this stream? This task involves choosing the specific topic, contacting speakers and handling their submission in the online system of the conference, to which you will then get access. Usually, but not necessarily, the session organizer is also session speaker and/or chair. If you are interested, please let me know.

If you are interested in organizing a session, please provide me at the earliest your session title and the names of 4 speakers for the session. If you are interested in giving a presentation, please provide me with your title and abstract. The system will accept session chair names till January 19, 2018. An early commitment is greatly appreciated.

Please feel free to contact me if you have any questions.

Debjit Roy
TSL Cluster Chair, INFORMS International Meeting, Taipei, Taiwan
