2018 INFORMS International Conference

16-20 June 2018, Taipei, Taiwan

CALL FOR PAPERS

"A BETTER WORLD THROUGH O.R., ANALYTICS, AND AI"

Conference Scope and Theme

2018 INFORMS International Conference program committee is committed to organizing a high quality program with diverse participants sharing their vision, knowledge and experience in Operations Research and Analytics. World leading plenary and keynote speakers from academia and industry as well as promising start-up companies will present state-of-the-art OR/Analytics and AI research and applications. The conference also offers tutorial tracks and theme-based industry tracks, including topics such as New Retail, Industrial 4.0, Smart Cites, Smart Healthcare, Smart Agriculture and Financial Technology. In addition, a hackathon competition will be held to encourage rising talents' contributions to OR/Analytics and AI. Awards will be given to outstanding teams from industry or academia as well as startups in these fields.

This conference presents excellent opportunities for you to present your OR/Analytics related work, to learn about the emerging technology and applications, and to network with international leaders of the profession. We invite you to submit a paper, which will be published in online proceedings by INFORMS.
