

Call for Papers

2019 IISE Annual Conference & Expo
Rosen Shingle Creek Hotel, Orlando, Florida
May 18 – May 21, 2019

Track: LOGISTICS AND SUPPLY CHAIN

Deadline for abstract submission is November 9, 2018
Abstracts are required to be between 100 and 200 words

Abstract submission site: <https://www.conferenceabstracts.com/IISE2019.htm>

Conference web site: www.iise.org/annual

Dear Colleagues:

The Logistics and Supply Chain (LSC) Division of the Institute of Industrial & Systems Engineers (IISE) is sponsoring the Logistics and Supply Chain Track at the 2019 IISE Annual Conference and Expo. The conference is a forum for exchanging knowledge and discoveries in the industrial and systems engineering research and practitioner communities. The 2019 IISE Annual Conference and Expo integrates research and industry under one conference.

As track chairs of the Logistics and Supply Chain Track, we would like to encourage you to contribute to the conference by submitting an abstract. Authors of accepted abstracts will be invited to present their work in a session, choosing either a standard 20-minute presentation or a new 40-minute presentation for a lengthier discussion. Each session will be 80 minutes. Abstracts are welcomed for the Logistics and Supply Chain Track in the following areas:

Logistics Network Optimization Logistics Network Simulation Inventory Optimization and Control Warehousing and Distribution Systems Supply Chain Modeling and Simulation Supply Chain & Logistics Applications Transportation Systems Supply Chain Analysis and Design Green or Sustainable Supply Chain Logistics for Energy Production	Procurement and Supplier Selection Demand Planning Information Sharing Coordination and Collaboration Offshoring and Reshoring Humanitarian Supply Chains Supply Chain Reliability and Resilience Service Supply Chains Reverse Logistics
---	---

In addition to the traditional abstract and presentation, two other options are available for presenting your work: an extended abstract and a full paper.

- **Extended Abstract.** A new feature at this year's conference, the extended abstract is intended as a mechanism to explain the author's' work in more detail than the standard conference abstract allows. An extended abstract can include problem descriptions, technical details, and a brief analysis of the conclusions reached in the study or the impact of the engineering work to be discussed at the conference. Extended abstracts will be limited to three pages and will be judged based on correctness (e.g., accuracy of the statements made, relationships to other problems in the field), professionalism (e.g., quality of grammar and figures, adherence to formal writing standards), and content (e.g., sufficiency of information convey beyond the standard conference abstract). Extended abstracts must contain citations where appropriate, and may not plagiarize (or self-plagiarize) other work in the literature. Authors will be able to claim these works as *refereed extended abstracts*, which will be publicly viewable. They will not be copyrighted or indexed in the official conference proceedings, and therefore there is no limitation on reusing extended abstract material for other purposes (e.g., toward the publication of journal papers or subsequent conference proceedings).
- **Full Paper.** Like previous years, full papers should contain results that are *significant* and have *archival value* to the industrial and systems engineering research and practitioner community. Full papers have a six-page limit and will undergo a double-blind peer review process with more rigor relative to the extended abstract. Accepted papers will be copyrighted and indexed in the conference proceedings. Authors of rejected papers will be given the opportunity to resubmit their work as an extended abstract.

Important deadlines for the conference are as follows (**NOTE: THERE WILL BE NO EXTENSIONS**)

- Abstract Submission Deadline: **November 9, 2018**
- Notification of Decision on Abstract: **November 30, 2018**
- Submission of Extended Abstracts and Full Papers (optional): **January 18, 2019**
- Notification of Decision on Paper: **February 19, 2019**
- Final Version of Full Paper Due: **March 5, 2019**
- Presenting Author Registration Deadline: **March 12, 2019**
- Schedule Published: **April 2, 2019**
- 2019 IISE Annual Conference and Expo: **May 18-21, 2019**

If your abstract, extended abstract, or full paper is accepted: (a) the presenting author must register for the conference by March 12, 2019 (presentations without the presenting author registered for the conference will be withdrawn from the program and the proceedings); (b) the presenting author must attend and present the paper at the conference (presenting authors who fail to attend will have their paper withdrawn from the proceedings); and (c) all authors who submit an extended abstract or a full paper are expected to review two extended abstracts or full papers (as appropriate) for fellow authors.

There are also opportunities to organize invited sessions, panels, and tutorials. In addition to research and practitioner presentations, the annual conference offers many opportunities for attendees, including plant tours, networking, and keynote speakers.

We look forward to seeing you in Orlando!

Regards,
