

Spring Research Conference 2016
Illinois Institute of Technology
May 25-27, 2016
Chicago, IL

Dear colleague,

Illinois Institute of Technology is hosting the 2016 Spring Research Conference, May 25-27, 2016, in Chicago, IL. Details, including updated conference program and submission information, are available at

<http://iit.edu/src2016>

We encourage the participation of young researchers, and welcome submissions for contributed talks and posters. Some money is available to support the participation of students. Information about submission deadlines and other logistics will be posted in the second announcement and on the conference website.

This meeting continues the tradition of annual Spring Research Conferences (SRC). The purpose of SRC is to promote research in statistical methods that address problems in industry and technology and to stimulate interactions among statisticians, researchers in the application areas, and industrial practitioners. SRC has a history of more than two decades, and continues to explore many important topics, including statistical methodologies and theories on design and analysis of experiments, uncertainty quantification, computer experiments and statistical

computing, applications of data science in business, industry and government policy making, methods on quality improvement and measurement system, etc. SRC is sponsored by the American Statistical Association (ASA) Section on Physical and Engineering Sciences (SPES) and the Institute of Mathematical Statistics (IMS).

Keynote speakers:

- Dennis Lin, Pennsylvania State University
- Jeff Wu, Georgia Institute of Technology
- Henry Wynn, London School of Economics

Program Committee:

- Lulu Kang (IIT, chair)
- Ryan Martin (UIC)
- Fred Hickernell (IIT)
- Sonja Petrović (IIT)
- Michael Zhu (Purdue)
- Frederick Phoa (Sinica, Taiwan)
